

CM100GLTE

Unlock BlackVue Cloud access. Share Wi-Fi in your car. **LTE Connectivity Module**

With **Mobile Hotspot Function**, your compatible BlackVue can now turn into a mobile internet router for up to five devices concurrently. This means you and your passengers can now use your BlackVue's internet on your laptop, portable game console, tablet or mobile. To connect to the BlackVue, simply open your device's Wi-Fi menu, select the BlackVue and enter the dashcam's Wi-Fi password.

The **CM100GLTE** provides easy 4G LTE connectivity to enable BlackVue Cloud features. All you need is a valid Nano SIM card. The CM100GLTE is powered and connects via the USB port of your dashcam.

When connected to the **CM100GLTE**, your BlackVue can serve as a mobile hotspot providing wireless Internet access to up to five devices (smartphone, tablet, etc.).

Note: when purchasing, make sure the **CM100GLTE** you choose is compatible with your mobile carrier's network.
